SCHOOL BOOKS REQUIRED

At a meeting of the Blairmore school board last night the following resolutions were passed:

"Any child born during the year 1925 shall be admitted to school for the fall term. This ruling is without prejudice, and is made in due consideration of the extreme light enrollment for Grade I. this year, and shall have no bearing whatever on future admissions."

"That free school books be supplied to indigent families on order from the town relief committee and registration of the principal. Further, we ask the press to request families who have a stock of spare books to donate same to the relief committee or school principal for the benefit of poor children."

CONSTANCE BENNETT HAS NEW TRIUMPH IN "SIN TAKES A HOLIDAY"

In her latest dialogue triumph "Sin Takes a Holiday," Constance Bennett, the distinguished Pathe star, demonstrates again in her inimitable fashion that women have this in common with the Northwest Mounted Police—they always get their man. The picture opens a three day run at Cole's theatre tonight.

In the role of secretary to a phlegmatic millionaire, Miss Bennett is said to voice the epigrammatic dialogue with characteristic charm and to carry the role with a sophistry that is peculiarly her own. She has the clever support of Kenneth MacKenzie, Basil Rathbone and Rita La Roy. The picture was directed by Paul Stein.

"Sin Takes a Holiday," from its title to the fadeout, is characteristically a Constance Bennett story and according to reviewers, the picture lifts this brilliant star into the heights of her most notable achievement.

BELLEVUE MINERS' CEMETERY

The members of the Bellevue Miners' Union wish to thank all those who kindly donated and enabled them to repair the fence around the miners' cemetery at Bellevue. The members also appreciate the kindness of Mr. Vissac, who supplied all the wire, planks, boards and props, and Fisher Bros. and S. Raymacker, who hauled the material. The following cash donations are acknowledged: T. Cantalini \$5.00; R. Johnston, W. Cole, F. Wolstenholme, Smith Meat Market, Bellevue Meat Market, W. Kerr, H. Meade, R. Hughes, C. Ray, G. K. Sirett, W. Goodwin and Canadian Legion, \$2.00 each; C. Emmerson, H. Zak, J. A. Barbour, James Cousens, L. Fidenato, A. Boutry, P. Krill, J. Green, L. Goodwin, Dr. Reinhold, F. Padgett, S. Barry, N. McDonald, J. Labourier, F. Turner, D. Truitt and J. Tutt, \$1.00 each; Mar Ming, 50c.

CHARLIE IS BACK AGAIN

The forlorn figure with the funny feet, baggy trousers, frowzy derby and bamboo cane waddles into hilarious misadventures to warm the heart of the world with merry laughter. The greatest cure for blues, gloom and trouble ever concocted by the sunshine doctor of good cheer. You've never had and never will have such a glorious time! Playing at Cole's theatre, Bellevue, on Thursday, Friday and Saturday of next week.

Word comes from Newfoundland that Port aux Basques is to be made an important terminal port. The scheme as outlined includes the erection of a large bonded warehouse and establishing of a port as a terminal for a fleet of ocean-going steamers. The new venture is likely to cut into the St. Pierre trade, for a large warehouse for the storage and distribution of liquor will be located at Port aux Basques.

TRANS-CANADA HIGHWAY ROUTED THROUGH CALGARY

Edmonton, Sept. 1.—The minister of public works, H. H. O. L. McPherson, announced this morning that, as a result of discussions carried on during the past two weeks with the governments of neighboring provinces of British Columbia and Saskatchewan, it was now possible to definitely announce the selection of the route of the trans-Canada highway, and that the Banff-Calgary-Medicine Hat highway has been definitely selected as the Alberta location.

HILLAREST HAPPENINGS

Several detachments of men left on Saturday and Sunday for the forest fire north of Coleman.

School opened on Tuesday, the only change in the teaching staff being Miss Irene Turner.

Grade XII is being taught here this year for the first time.

Miss Margaret Grant returned on Friday from her holiday, spent with her brother in San Francisco.

Mrs. F. J. Smith returned on Sunday last from a short stay in Calgary.

Mr. Duncan Campbell and his cousin, Miss Jean Campbell, left on Sunday evening for Edmonton.

Miss B. O. Sellen returned Monday evening from Vancouver, where she has been spending her holidays.

There was a slight outbreak of fire at Passburg last week, which was quickly put out by the fire fighters.

Mr. and Mrs. W. Brushett returned Monday by car from Edmonton, where they spent an enjoyable vacation.

Miss Jessie Greener left for Milk River on Sunday last, where she will take up her teaching duties.

Mr. C. Hulley returned from his holidays, spent at Vancouver.

Myles Robinson has been appointed "boss" for The Blairmore Enterprise and is delivering the paper every Friday.

CORBIN HAPPENINGS

Little spirals of smoke drifting skyward, bare, fire blackened earth, tall skeleton trees and the entire valley filled with a smoke haze—these tell-tales are marks of the fire which raged in this valley on Monday, Tuesday and Wednesday of last week. On Monday last, two fires swept toward Corbin simultaneously, one racing down the valley, enveloping Number 6 mine and camp, the other coming over Coal mountain. At about three o'clock two cyclones, one after the other, scattered fire all over the surrounding hillsides, starting spot fires everywhere. The main force of the fire was spent by Thursday night, leaving stumps, etc., smouldering behind. The town is still closely watched for any fresh fires that might be fanned into action by winds. The fire which came towards the Wye from the Flathead has changed its direction, and is now travelling in a general northerly direction toward McGillivray. This fire is burning in thick brush and timber on both Corbin Coals and Crews' Nest Coal property.

Corbin footballers played against Fernie on the local field on Sunday afternoon, winning the game from the visiting team with a score of 3-2.

Master Roy Taylor left for Fernie Monday, where he resumed his studies at the Fernie high school on Tuesday.

The local public school opened for the fall term on Tuesday of this week.

The town of Corbin has been promised a new community hall, to be built this fall.

Col. Hugh Clark remarks: An old clergyman says that the men of today are no more fearless than were the pioneers. And yet it is a safe guess that he doesn't preach hell now the way he used to.

Police Hobb: "Your little dawg 'as bit me, lady."
Lady: "Where?"
Hobb: "I really couldn't tell yer where, ma'am."
Lady: "Nonsense. He couldn't reach that height."—The London Opinion.

WORLD HAPPENINGS BRIEFLY TOLD

John Tamar, who served as a farm hand on a farm near Debrecin, Hungary, for 101 years, died at the age of 112.

Thomas A. Edison, noted scientist, is on his way to complete recovery from his recent illness, Dr. Hubert S. Howe, his physician has announced. Estimated cost of providing relief work to Vancouver's unemployed men with dependents, of which the city must bear an undetermined portion, will be about \$450,000 a month.

Excavations on the site of the new Royal Bank of Canada in London, England, have resulted in the discovery of an 1,800-year-old pig puzzle in a Roman pavement.

In the two weeks from August 1 to August 15, 114,000 workers lost their jobs in Germany, bringing the country's total of unemployed to 4,104,000.

Approximately 10,000 head of cattle have been shipped from Canada to the United Kingdom so far this season, according to information in the office of the Hon. Robert Weir, Minister of Agriculture.

Total grain shipments from Vancouver for the crop year ending July 31 were 75,154,053 bushels, an increase of 25,480,745 bushels over the figure of 49,673,308 bushels shipped in the previous crop year.

During the months of May, June and July, the fog horn was sounded a few minutes over 772 hours, a period, had it been continuous, of over thirty full days, stated the keeper of the Yarmouth light and fog alarm at Cape Porcupine, Nova Scotia.

A reduction of two per cent. in the Canadian birth rate in the first seven months of the year is shown by a preliminary report of the Dominion Bureau of Statistics. The total to the end of July was 50,851 births, as compared with 52,057 in the corresponding period of last year.

Prosperity Plan

Five Year Moratorium On War Debts Is Proposed

A five-year world prosperity plan was outlined to delegates from 20 countries attending the world social-economic congress at Amsterdam, by Dr. Louis L. Lorwin, of the Brookings Institution, Washington, D.C.

He told 300 economists, industrialists, labour leaders and government officers that a general five-year moratorium on all war debts and reparations payments was the first necessary step to give the world a breathing spell from what he termed its most aggravating and dangerous post-war problem.

News Falls To Break

An editor apologized to his readers after this fashion: "We expected a marriage and a death to publish this week, but a violent storm prevented the wedding, and the doctor having taken sick the patient recovered and we are accordingly cheated out of both."

"Do you belong to the town?"
"No."
"Then we're neighbours. I don't come from it either."—Lustige Kolner Zeitung, Cologne.

W. N. U. 1904

To Combat Drought Causes

Saskatchewan Seeks Means For Assisting Dried-Out Areas

The Saskatchewan Government has appointed a voluntary commission of six, headed by Hon. J. F. Bryant, K.C., Minister of Public Works, to investigate all contributory causes of drought in the southern portion of the province and to suggest plans for combating such causes. This Commission, described as a "Commission on Conservation and Afforestation," has already taken steps to assemble all pertinent data from the municipalities situated in the drought areas of the province, and as part of its assigned duties is to recommend sites for dams for the conservation of water in the creeks and rivers of the south. The Government proposes to seek Federal aid in the erection of dams at the sites suggested. Personnel of the Commission: Hon. J. F. Bryant, K.C., chairman; Hon. W. C. Bueckle, Minister of Agriculture; W. D. Cowan, M.P. for Long Lake; Dean MacKenzie, Hon. W. C. Bueckle; T. A. Patrick, M.D., and Lieut.-Col. F. J. O'Leary, Regina.

A complete review of the lines of investigation which the Commission will follow is given in the following statement issued by the Chairman, Hon. Mr. Bryant:

"The commission on conservation and afforestation intends getting down to business as soon as possible, and in the meantime in order to assemble data, as chairman of the commission I am today sending out to the secretary of each municipality in the dried-out areas of the province a questionnaire asking that the council of the municipality co-operate with the commission in supplying the following information as carefully prepared as possible:

1. Name of municipality.

2. Number of farms. Number of abandoned farms, if any.

3. Has there been any drifting in your municipality, and if so, to what extent?

4. Number of groves of trees in the municipality.

5. Approximate acreage in trees in the municipality.

6. Number of farms with shelter belts.

7. Number of farms raising fruit trees, and with what results.

8. Number of farmers having dug-out on the property, and if not, or not there is any water, in same this year. Have they been dry at any time?

9. Number of wells that have gone dry, if any, in the municipality.

10. Number of acres owned by the municipality as a result of tax forefeitures.

11. Is said land suitable for agricultural purposes. If not would it lend itself to afforestation?

12. The kind of trees most commonly found in the municipality.

13. Are there any lakes, sloughs or large bodies of water in the municipality, and if so, give the approximate acreage of water surface.

14. Please specify any points in the municipality where by the construction of a small dam or a right-of-way measure water could be advantageously conserved.

"In making application to Ottawa for relief moneys, the Government is suggesting that a portion of these moneys be set aside for the construction of dams as a relief measure, and therefore any suggestions as to possible sites for dams will be welcomed, and checked over by the engineers, so that such action as might be deemed advisable could be taken in the case of the most desirable site mentioned.

"In the interests of a moisture supply of the dried-out and semi-dried-out areas, steps are being taken to assemble all the data as to the rainfall in these districts since the commencement of the meteorological records by the Federal Government and by the Department of Agriculture in Saskatchewan. An effort will be made to ascertain whether or not present conditions are due entirely to an act of providence or whether it has been brought about in part by human activities such as cutting down the trees which originally formed a wind break and the draining of water areas and sloughs during the past 35 years in order to cultivate the land. In the spring some of our

are as veritable rivers, in the summer they are practically dry.

"The commission will endeavour to ascertain whether or not by improving this water and by damming the north Saskatchewan, the south Saskatchewan, Frenchman's Creek, Wood River, Moose Jaw Creek, Swift Current Creek, Wascana Creek, Souris River, Moose Jaw Creek, Pipestone Creek and others to form a series of lakes of considerable area, if this would be effective in preventing drought conditions.

"At the same time it would be desirable if each farmer in the dried-out areas would select a natural basin on his land to which the surface water drains, and make a dug-out; such dug-out not to be too wide because the water would evaporate with a wide surface, but to be made long and deep, and if later on trees were planted around the dug-out, the trees would catch and hold the snow and eventually the dug-out would furnish a permanent supply of water for the farmer and his stock. This would help dams at the sites suggested. There was a dug-out built during the slack times on every farm in the dried-out area.

"When the first settlers reached the State of Nebraska there was not enough wood to supply the large trunks. Nebraska was the largest body of treeless land in the United States and was described on the map as the great American desert. For 50 years Nebraska has carried on a tree-planting policy. Today there are 2,000,000 trees in that state and as a result the annual rainfall has increased to more than 30 inches, and even the sand hills produce good potatoes and the western part of the state formerly formerly produced nothing at all is now one of the heaviest producers of sugar beets in the country.

"Such measures would, of course, be costly, but when we consider that drought can cost the Province of Saskatchewan a loss of around \$200,000 in a single year, we feel that it is worth while to make an effort to find a sound and economical solution of the problem.

"In Saskatchewan we get around \$200,000 from the Federal Government under present conditions annually. In Sweden, where the area suitable for growing is no greater than the forestry policy the wooded area produce nearly \$100,000,000 per annum.

"The Minister of Public Works, in conceiving tree-planting policy it is possible to increase the rainfall in the province by a very material increase agricultural production, and at the same time to produce sufficient food for the people and to pay off our provincial debt.

A systematic and definite forestry and conservation policy under a commission appointed for a term of 10 years at a time, and embarking on a definite plan which would take 65 to 75 years to fully mature, would work marvels in the southern part of Saskatchewan. A 10-year plan would avoid uncertainty and would make the scheme definite. For each 10-year period a definite sum could be sanctioned and amounts required voted year by year against the estimates."

The Minister of Public Works, in conclusion, stated that he was anxious that all farmers in the dried-out areas should communicate, at once with the secretary-treasurer of their municipality, giving information as to the number of acres of trees on their land; the fruit orchards, if any, and their success in connection therewith; the number of trees of water on their land; whether there is a dug-out on their land or not. Further, if the well has gone dry, they are requested to report same to the secretary of the municipality.

Montreal Grain Deliveries

Grain deliveries from the Port of Montreal for the season to date topped the fifty million mark on August 4th, the amount shipped being 50,093,867 bushels. This figure compares with 49,269,982 bushels in the corresponding period of last year. Grain receipts at the port had reached the fifty million bushel mark several days earlier.

A filament for a new type of electric lamp is one-fifth the thickness of a hair?

HOW HE FLEW FROM "DOWN UNDER"

The picture above was taken in a London, England, hotel when J. T. Mollison, the young Glasgow aviator, who broke the world's record for the solo flight from Australia to England by two days, told the reporters how he did it. In order to cover the 15,000 miles in eight days he only had two hours' sleep each night, and the picture shows him, very tired, but happy, as Hon. Mr. and Mrs. Victor Bruce in the rear listen to his thrilling tale.

SUNDAY SCHOOL LESSON

SEPTEMBER 8

TURNING TO THE GENTILES

Golden Text: "I have set thee for a light of the Gentiles, that thou shouldst be for salvation unto the most part of the earth."—Acts 13:47.

Lesson: Acts 13:15-52; Romans 1:14-16; 11:1-24.

Devotional Reading: Psalm 72:6-13.

Explanations and Comments

The Result of Paul's First Sermon in the Synagogue At Paphos

Acts 13:42-44.—After Paul's sermon, he and Barnabas withdrew from the synagogue, while the congregation remained for the end of the service and the formal dismissal. As they left they were urged to speak again the following Sabbath. When the synagogue services were over, many Jews and proselytes (Gentile converts to Judaism) and many of the chief men of the synagogue gathered together to hear the word of God on the next Sabbath. (A different Greek phrase is used in verse 42 for "the next Sabbath" from that in verse 44, and some scholars translate it in verse 42 as "the Sabbath after.")

Jewish congregations had a portion of the Law read in the synagogues on the Sabbath, but on Monday and on Thursday mornings, that they might not be for three days without the Law, the Jews had a peculiar expression may apply to the meetings in the synagogue on these days.

The preaching of Paul during the week created a tremendous interest. He turned to Paul words, but to the envy of his success. It was not loyalty to sacred truth which led the Jews to turn to Paul and blasphemy.

Turning To The Gentiles, Acts 13:46-49.—Finding that the Jews would not listen to Paul, Paul and Barnabas spoke out boldly and said, "It was necessary that the word of God should first be spoken to you. Seeing ye have refused to believe, and judge yourselves unworthy of eternal life, we turn to the Gentiles." This is a turning point in the history of the Gentile Mission, which occurs frequently in the following narrative and appears to be the point at which the apostles would not have spoken to the Gentiles at all, if the Jews had listened to the word of God.

Notice the well-guarded balance between the Jew's alleged purpose for turning to the Gentiles and the statement of his own life: "It was necessary, but ye thrust it from you, and judge yourselves unworthy of eternal life. In His resurrection from the dead, the offer of spiritual freedom, of pardon, peace and joy—all were thrust from you and rejected because these things were to be a common heritage."—John Gardner.

Persecution.—Acts 13:50-52.—The Jews now had recourse to the "devout women of honorable estate, and the chief men of the city"—the Roman colonists, the local aristocracy, as Professor Ramsay calls them, with their high privileged class and held the reins of government. These joined forces with the Jews in persecuting Paul and Barnabas till they were driven from the city.

Paul and Barnabas shook off the dust of their feet against them. This was not a childish act nor a sign of contempt or ill-will, but was symbolic action implying that those to whom it was done were left to go their own way, they will not accept heaven, let them retain earth and its dust."

Starke.

"Ye are the words of Jesus in Luke 9:5: 'As many as receive you not when ye depart from that city, shake off the dust from your feet for a testimony against them.'"

The Universal Gospel, Romans 1:14-16.—"I am a debtor," wrote Paul to the Romans, both to Greeks and to barbarians, both to the wise and to the foolish. "The gospel belongs to all mankind. Those who have it are by that fact constituted debtors to all who have it not. Paul felt a peculiar call and obligation to Greek and barbarian. Christ sent him to the Gentiles."

On every Christian this debtors rests until every man has been given the gospel.

Lost Of It Used

Several drummers were seated in the smoking compartment of the train. They were bemusing the generally demoralized conditions of business, as they found it. Finally they turned to the quiet little man in the corner.

"And how do you find things, brother?"

"Never better since I've been on the road."

"For the love of Pete and what's your line may we ask?"

"Selling red ink."

Distant ancestors of the horse, that lived in early geologic times, were no bigger than small dogs.

More than 100,000 timepieces were imported into British Malaya last year.

Cannibals In Australia

Black Men Of North Western Section That Human Flesh

Cannibalism still exists among the nomadic black men of north-western Australia, according to a report on the Gulinia and Cullarib tribes just issued by the Catholic Anthropological Conference.

The report is from the Rev. E. Alcaide, missionary among them since 1908.

"They are expert butchers," he says. "The heart goes to the strongest and is the first part of the body to be disposed of. Next the shoulders, arms and trunk are given to the men, while the legs go to the women. All this is systematically carried out. All the flesh of the white man is looked upon as a dainty morsel."

"These aborigines live nomads without fixed home. They have neither house nor furniture and possess little beyond their spears, boomerangs, and battle axes which they always have at hand; they wear no clothing except when they come to the mission. As soon as they get out of sight all clothes are cast off. The women are the slaves of the men and, when necessary, are the beasts of burden. Murder is the greater arbiter of all disputes."

Egg Market Prospect

Many Producers Are Renewing Their Faith In The Egg Market

The current issue of the Egg and Poultry Market Review, published by the Department of Agriculture at Ottawa, after calling attention to the definite turn for the better which is now apparent in the egg market throughout the Dominion, makes the following observation with respect to the present situation:

"Since early in the spring this publication has consistently pointed out the probabilities of the situation which appear now to be developing. A reduction in flocks, such as has taken place in many sections, was anticipated. During recent weeks there has been an active demand for pullets, indicating that many producers are renewing faith in the egg market and are anxious to enlarge their flocks over the proportions planned for earlier in the spring."

Sacrificed To Science

Wilfred Douchette Dies Of Fever He Added War Doctors To Mosaic

Wilfred Douchette, who risked his life in the cause of medical science by permitting himself to be inoculated with trench fever germs in France during the World War, died of a fever here at New Haven, Conn., after lingering for years suffering from the fever. He lived for a year in a French hospital, segregated from companions and returned after the armistice broken in health. He had been a hopeless invalid ever since then.

Mr. Douchette revealed with a brother, although he had been in hospitals most of the time since the war. He was buried with military honors.

A Television Broadcast

Moving Picture Shown In Department Store At Montreal

A small gathering at Montreal saw what was probably the first broadcast of a moving picture by television in Canada. The picture was sent out on the fourth floor of a local department store and presented on a receiving set on the fifth floor.

Through an instrument that looked like a phonograph horn with a small mouth, behind which was a large revolving perforated disc and a special neon tube, a glimpse was caught of a tiny silhouette moving picture in black and white relating the adventures of "Fat Fanny" Falling Fast and Furious.

He—"Oh, you mustn't blame me for my ancestors."

She—"I don't. I blame them for you."

Chemists have developed five methods of making artificial silk.

The Dragon

"You might have brought the boy out of the water dry, and... where's his cap?"—Hummel, Hamburg.

CHAPTER XXVIII.—Continued

"Yes, I know you. You have come before, but you always go just when I think you're just as you have gone. He went down in a dreadful storm—my Nick! There are sharks in those waters, and other awful things. I've seen him fighting them—struggling—his hair all wet and matted. I—"

Fear was in her eyes now, fear for her best beloved. She trembled, and her voice rose higher. Desperate, Nick bent to her, speaking with slow distinctness.

"Listen, my precious little wife. I am Nick. I was not drowned. I did not fight those terrible things that haunt you. They are only a dream! But I am not a dream; could a dream hold your hands like this, Gay—and kiss them—like this? Look into my eyes. Can't you believe me, my darling?"

She drew her hands away, putting them to her head as if confused again. "I believed before—and you were wrong."

"Nick was breathing hard, as if at the end of a long race. Oh, if he could fight with his bare hands! He thought savagely. But to battle with something intangible—to conquer something unseen. . . . The law set grimly. He would conquer it! He would find a way to set Gay's tortured spirit free—to bring back the soul to her eyes. Perhaps if he began at the beginning—if he kept calm and steady, and took her back to their first days together—if he recalled to her poor, sick mind the vows he had spoken, wouldn't she understand? Wouldn't she know him?"

He said, taking her hands in his. "Gay, you are breaking my heart. You think me a myth—an hallucination—a part of those dreadful nightmares, when all the time I am really Nick, come home after a long journey. But I shall make you believe me. Will you believe I am—if I tell you something that nobody in the whole world knows but just ourselves? I'll tell you where we were married, darling. It wasn't where everyone thinks it was, you know, in the office of the Justice of the Peace, with you looking every minute at Abraham Lincoln when you ought to have looked at me! The stars were shining when we were married, Gay, and someone near, far away a herald thrush was singing his evening song. We called it our bridal chorus—don't you remember? You were looking straight into my eyes, sweetheart, and I said: "God's a good enough witness for me, Gay; and I promise you now that

Aching CORNS STOP HURTING INSTANT RELIEF!

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "Putnam's" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store, 35c.

PUTNAM'S
W. N. U. 1905

"I'll love you—and honour you—and be true to you. . . ."

Slowly, steadily, surely, the shadow was lifting from Gay's eyes. Watching, Nick scarcely breathed. As the distress and fear gave way, her face took on a new and magical beauty. It was like the slow, exquisite opening of a flower. She smiled; stretched out her arms; and cried, her voice echoing out gladly in that silent house: "Nick! dear Nick! it really is you? Oh, if you love me, stay with me—stay with me. Don't leave me. . . ."

She was in his arms.

"Never again," Nick promised as he held her close. "Never, never again."

In the room below, Julie Nippe paused in the polishing of a candlestick, and with a wild sob threw herself on Janey Maxwell's breast; while, crouching on the stairs, where he had been listening tensely, for those wonderful words, an old man raised eyes that were blurred with tears.

"Oh, God—our Heavenly Father," he said brokenly, "we thank thee."

He arose, gasping, as if he could not breathe, and stepping into the air, looked up in rapture at the limitless blue above.

CHAPTER XXIX.

Three followed days when Nick never left Gay's room save while she slept. If she awakened to find him gone her eyes would widen pitifully with fear that his return was but a dream. After the first, glad outburst of joy, she was alarmingly weak; but as the days passed and her strained nerves relaxed, the serenity that was the keynote of her character came back again.

Nick never forgot those days when he lived in dread of a relapse. But did not come slowly, to be sure, but with encouraging steadiness, she returned from that dread "no man's land" where she had wandered; yet, unless he were at her side, it was days before she could remember the fact that her husband was really safe. "I know I'm foolish," she said apologetically, "but your being here is so wonderful that I want to keep you a prisoner every minute."

"Keep me," Nick answered. "It's a case where the prisoner hugs his chains."

After the first, anxious week, those were happy days. Sometimes the little boys would steal in quietly, and climbing onto their father's knee, listen to his story of the strange and beautiful islands he had seen. Of the storm, and the time that followed, Nick never spoke, nor did Gay ask. Her dreams of the horror had been too vivid. Sometimes, perhaps, he would tell her, but not now. Nothing he would touch her for the present.

It was three weeks before Halliday returned, and he came alone. Nick sometimes wondered what passed between him and Angela in the hours following her outburst. She did not appear again before Nick left the boat; and her husband's explanation of a sick-headache was accepted with polite credulity on the part of the Myers. It was only Nick who saw the Colonel's suggestively lifted eyebrows.

As for James Halliday, he seemed almost pathetically glad to be back in Bakeriville, and small Martha was seldom absent from his side. It was as if he had been away for a long time. When he was in the office of the Justice of the Peace, with you looking every minute at Abraham Lincoln when you ought to have looked at me! The stars were shining when we were married, Gay, and someone near, far away a herald thrush was singing his evening song. We called it our bridal chorus—don't you remember? You were looking straight into my eyes, sweetheart, and I said: "God's a good enough witness for me, Gay; and I promise you now that

"My baby sister's got a name. Her name's Nancy, same as Uncle Sim's old woman. What you think of that?"

"That's fine," said Halliday. He took a seat on the edge of Selma Sim's old rocker, and smiled at the little boy in his miniature overalls. "He's called Uncle Sim, say?" he questioned.

"Here comes Uncle Sim now," he said he was "fabergasted." I guess he meant "sprled." He acted that way. Was you sprled, Uncle Sim?"

"Now what would I be surprised at?" asked Simson, adjusting his umbrella so that it sheltered little Martha's head.

"I mean about my baby sister having the same name as your old woman. You acted sprled."

"Well, and I was!" Simson turned to Halliday, his face as beaming as a Jack-o'-lantern. "You could 'a' knocked me down with a feather and no mistake. Always thought if I had a girl of my own I'd call her Nancy, but the good Lord never see fit to send us one, nor a boy neither. Seems like I love that little critter just like she belonged to me. When they told me they'd named her after my old woman I felt like my cup was runnin' over."

"Did it spill onto your bib, Uncle Sim?" asked little Martha sympathetically.

Halliday smiled, and Simson grinned broadly.

"Seems like it did, honey. It spilt all over me in a nice, warm, comfortable 'ood."

"Our shower bath can do that," said Martha. She arose, and leaned lovingly against Halliday's knee. "I wish we had a Nancy," she said quietly.

Halliday stroked her hair. (To be Continued.)

Not An Unknown Country

Contours Of Sea Floor Are Familiar To Geologists

Below the surface of the great oceans there lies more land by far than is comprised in the area of all the continents. It is not altogether an unknown country. The sea bottom is constantly studied and its general contours are familiar to geologists. It is known, for example, that the Atlantic Ocean lies above an immense plain, surrounded by an incline that rises very slightly for some hundreds of miles to the continental shores. In a few places are mountains under the sea, tops of which are lonely islands. And here and there are extraordinary depressions, deeper by a mile or more than the general ocean bottom.

One of these lies between Cuba and Honduras, and is called the Bartlett Deep. Not much is known of it except that it is two miles deeper than the ocean floor and is like a gigantic crack, a thousand miles long and about fifty wide. It is supposed to be of volcanic origin, and it is thought that seismic disturbances may well begin in its dark depths, four miles below the surface, of the Caribbean Sea. This is a problem of importance, for an uneasy and unreliable fault in this location may make it inadvisable to pursue any further the project of a Nicaraguan Canal. There are some geologists who think it possible that an earthquake in the Caribbean might drain the water from the lakes which are to be linked to form the canal.

The navy proposes to find out as much as possible about conditions and contours in this submarine trench, and an exhaustive hydrographic survey. Curiosity concerning the sea bottom might be enough to account for this undertaking, but it has a more practical occasion in the necessity for exact knowledge concerning earthquakes and their effect on the affairs of commerce.

Important Decision Of King's Bench Judges

Rule That Man Is Twenty-Three Until He Is Twenty-Five

When is a man 23 years of age? Five judges of the King's Bench Division, including the Lord Chief Justice, Lord Hewart, decided in a case that was being argued in the Criminal Court of Appeal recently that a man is 23 until he is 24. The question arose over a section of the Criminal Law Amendment Act. Lord Hewart asked: "Does not a man cease to be 23 the moment he passes into his 24th year?" Counsel for the appellant submitted that a man was of the age of 23 for a period of 365 days—in other words, he was 23 until he was 24. The Lord Chief Justice announced that on the ground that there was ambiguity in the law the subject should have the benefit of the doubt, and the Court had decided to allow the appeal in behalf of the accused man.

Loudspeaker For 'Planes

Designed Especially For Use In Fighting Forest Fires

A newly-developed loudspeaker for airplanes, designed especially for use in the fighting of forest fires, has been tried out successfully at Roosevelt Field, New York. The loudspeaker, which weighs 100 pounds, was tried in a Fokker "plane piloted by N. C. Brown, who flew at a height of 1,200 to 1,500 feet, circling the field and talking. He was heard clearly over a radius of more than a mile. The speaker uses a wind generator and it will be adapted for use by police, the sponsors said.

Payment In Arrears

Prof. G. P. Lestrade, of Pretoria University, condemns the South African natives' practice of paying in cattle for wives on the installment plan. Nothing is more calculated to militate against the serenity of marital relations than the consciousness that there are still a few cows owing on the wife.

A Seven Months' Tow

On the longest towing voyage on record a floating dock of 17,000 tons lifting capacity is on its way from the builders in Wallend, England, to Wallend, N.Z. The tow of 13,500 miles will last seven months. Two powerful tugs are employed and the crew is living on the dock during the voyage.

The ambition of King George V. of England to own the most complete collection of British postage stamps in the empire over which his rules has been realized.

A Clever Engineer

Long List Of Achievements Credited To Sir Alexander Gibb

Sir Alexander Gibb, who has come to Canada to prepare a report on the ports and harbours, comes of an ancient Scottish family with engineering in its blood. He himself was a pupil of Brunel and Barry, and the list of his achievements and decorations fills a whole column of "Who's Who." They include such widely different undertakings as the dockyard at Rosyth and the wonderful aquarium at the Zoo. During the war Sir Alexander played a chief part in developing the Channel ports for the disembarkation of the army, and he was consulting engineer for the great new naval base at Singapore. He is a keen student of Burns, a member of the ancient King's Rolydoun for Scotland, and belongs to no fewer than ten clubs.

Changed Its Nature

X-Ray Experiment Converts Annual Plant Into Perennial

In experiments to learn more about effects of X-rays upon evolution, an annual plant has been changed into a perennial at Cornell University, Ithaca, New York.

X-rays have now changed its nature at Cornell in the eucalyptus, the closest wild relative to corn. There are two species, Mexican, the annual, and perennials.

Some of the seed was exposed to X-rays for a few minutes and then germinated. The young stalk began life as an annual, but later on, while still young, it developed some of the appearance of a perennial. Then the annual plant dried up and died, and the remaining stalk developed into a true perennial.

Trans-Canada Highway

Four Hundred Miles Of New Highway To Be Built Between Kenora and Heron Bay

The decision has been made by the Ontario Government that the trans-Canada Highway will run through the Ottawa Valley to North Bay and will go east from Kenora to Heron Bay. With regard to the intermediate stretch, it has not been decided whether the highway will be routed by Cochrane or Sudbury. In the stretch between Kenora and Heron Bay, there will be a partial re-location over a stretch of 100 miles. In the western section, between Kenora and Heron Bay, 400 miles of new highway will be built.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Expeller, an excellent remedy.

Brandon Industrial Survey

Facts Collected Will Be Published In Booklet Form

Brandon's most comprehensive industrial survey recently completed by Prof. Burton Hurd of the Manitoba College, for the use of the Brandon section of the Industrial Development Board of Manitoba will be partially published in booklet form. Facts concerning the city, not previously available, are given in a concise and interesting manner, and should be of special interest to industrial firms contemplating a site in the West.

Poland expects to receive \$2,000,000 from its state lottery this year.

"One should prepare for old age as one prepares for a long journey."

for BITES

Long, quick, or instant—the best treatment is plenty of MINARD'S LINEN.

Dr. Scott's remedy for bites and stings.

MINARD'S "KING OF PAIN" LINEN

New Material Found

Canada May Soon Be Able To Manufacture Mineral Wool

The important discovery that certain deposits of rock in the Niagara district of Ontario are suitable for the production of rock wool, a valuable insulating, lining and covering material, features a report issued by the mines branch of the Department of Mines. The report, by M. F. Goudge, deals with the possibility of establishing an industry in Ontario and manufacturing rock wool, which is classed as one of the most effective insulating materials known.

Rock wool, or mineral wool, as it is sometimes called, the report states, is not manufactured in Canada at present, as hitherto suitable raw materials were not known to exist within the Dominion. It is made from shaly limestones which possess certain definite characteristics. Research carried on in the laboratories of the mines branch by Mr. Goudge, indicates that several deposits of insulating limestone outcropping at various places between Niagara Falls and Hamilton are suitable for making rock wool.

In the process of manufacture, the natural rock is mixed with coke and charged to a small blast furnace where it is melted. The molten rock, issuing in a small stream from the base of the furnace is blown into a myriad of small globules by a blast of high-pressure steam. As the molten globules hurtle through the air each develops a very thin, pliable glassy fibre behind it. This fibre is known as rock wool.

The discovery of the suitability of the Niagara district rock for the manufacture of this commodity suggests the possibility of a new and valuable product being added to the mineral production of Canada, the report states.

THE RHYMING OPTIMIST

By Aline Macchialis

THE GLEAM ALONE

The friends whom I most love
Are like the stars to me,
As they gleam and move
Along immensity.

The stars are worlds, we know,
And worlds hold joy and pain,
Hold misery and weal,
And purity and stain.

But of those worlds afar
We see the gleam alone;
The glory of the star
That on our path has shone.

And so in friends most dear
We find no fault, no light,
But only joyous bloom
And opulence of light!

Should Be Congratulated

Woman In California Keeps Employers Regardless Of Age

There is a very special and particular achievement for which Mrs. Mary K. Solari deserves congratulations, entirely aside from the fact that she has just completed her twenty-fifth successful year in the restaurant business in San Francisco. That is the stand she has taken, as a business woman and as a human being, against the theory of "firing after forty," which has become so lamentable a practice in businesses and industries throughout the United States.

Out of eighteen employees, forty have been with her more than twenty years; five, over fifteen years; four, over ten years, which, in a staff of that size, is an extremely high percentage of long service.

Business women may justly feel proud that another business woman has taken up the cudgels so vigorously against this ruthless pushing aside of the so-called middle-aged without consideration of ability or intelligence.

A Good Investment

Comment has been made on the vast waste among beekeepers through the use of poor equipment. Well made hives with good frames of correct size are a good investment. Once combs are built they can be exchanged from hive to hive and used anywhere as needed. One is amazed to find the extent of the use of makeshift hives and frames.

No Source Of Revenue

Among the emergency bills sent to the Uruguayan congress and designed to help solve the financial crisis there is one requiring privately owned automobiles to pay from 20 cents to \$1 daily according to size for a permit to operate. Permits would be issued in the form of a large sticker with the day's date, pasted on the windshield.

WHEN GASTRIC JUICES FAIL TO FLOW

You know how badly an engine runs when it gets clogged up. It's the same with your body when your gastric—or digestive—juices fail to flow. Your food, instead of being assimilated by your system, simply clogs it, and stagnates, and, producing harmful acid poisons. What you need then is a tonic—Nature's own tonic—salts of the mineral salts. You get all these six salts in Kruschen Salts, and each one of them has an action of its own. Together, they stimulate and tune up the bodily functions from a number of different angles. The first effect of these salts is to promote the flow of the saliva and so awaken the appetite. The next action occurs in the stomach, where the digestive juices are encouraged to pour out and act upon the food. Again in the intestinal tract certain of these salts promote a further flow of these vital juices which deal with any undigested food and prepare it finally for absorption into the system. So you see there is no mystery about Kruschen. It works on purely scientific and soundly scientific principles. Prove it for yourself.

Little Helps For This Week

"Except ye become as little children, ye shall not enter into the kingdom of heaven."—Matthew xvii, 3.

Except your Father lead you, you cannot find the way. Among the angels and patriarchs, the lures that lead astray; Except you be like children, And hold the skirts to earth, You'll miss the narrow pathway That leads from earth above.

Blessed are ye if ye become as a little child, for a child is the visible likeness of the Lord Himself. And there is a blessedness in perceiving this truth; the blessing is the truth of it. He who holds the skirts to earth—the child—the pure childhood—sees the essence of grace and truth; in a word, real childlikeness.—George MacDonald.

Distemper responds quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

Market For Alberta Coal

Orders For 55,000 Tons Received From Electric Works

Investigation of the quality of various Alberta coals with a view to determining the fuel best suited to the requirements of the Winnipeg City Hydro-Electric Co. is being undertaken by G. W. Oliver, fuel engineer for the City of Winnipeg. It is pointed out that Winnipeg will be in the market during the coming winter for about 40,000 tons of coal for the central heating system and the contract will be placed with various Canadian companies. Orders for 55,000 tons of Alberta coal have been placed recently by large Winnipeg concerns.

Crude Oil Satisfactory

Upward of 200 barrels of crude oil per day are now being taken from the Ribstone wells for the use of the Canadian Pacific Railway in their locomotives on the mountain division between Calgary and Field, B.C. The railway company is stated to have found the fuel from the Ribstone area in eastern Alberta highly satisfactory and is likely to increase its requirements in the near future.

Expects Stork In July

"I Suffered such Pain"

MOTHER advised me to take the Vegetable Compound because I suffered such pain each month. "It helped me so much that after I married I still took it. I am expecting a little one in July and I depend upon Vegetable Compound to carry me over difficult times. Won't you try it too?"

Mrs. Ashby S. Smith, P. O. Box 174, Winnipeg, Minn. Now, Scotland is only one of thousands of women who depend on Vegetable Compound to carry them over difficult times. Won't you try it too?

RECENT EVENTS EM- BRACE A CHALLENGE

The Review, at the outset of this editorial, wishes to compliment Mayor Hanley and the Aldermen on their decision as regards the observance of their Flag Day, and Chief Duncan, and the city of Drumheller police, Sergeant Skelton, of the Alberta Provincial Police, and his men; Sergeant Clarke, of the Royal Canadian Mounted Police, and Constable Peden, of the Canadian National Railways, on the manner in which they handled the recent disturbances. The fact that members of the Canadian Legion and other citizens stand ready to help, showed that right-thinking people consider that there is something real and tangible to national ideals, and that loyalty to the best interests of this district and to Canada, is something much more than an academic discussion.

But, speaking generally, recent events cannot a challenge to Canada, just as recent events in Toronto, Vancouver, and throughout Canada, as investigation by high authorities show that they are all part of a plan to disrupt and cause unrest and discontent. Investigation has shown that men have been furnished by Soviet Russia to carry on the propaganda, which has been at the bottom of all Communist disturbances throughout Canada. The Communist agitators are on a pay-roll, and the channels are deep and widespread. Canadian authorities, who have been closely investigating, know full well that this is the truth. Freedom of speech is essential in a democratic country, but license, and disloyalty, treason and sedition are all horses of an entirely different color. However, it must not be assumed that all the Communists are foreigners, who cannot speak English, or soap box orators of British birth, but there are men in various walks of life, who are Communists and are helping to create trouble for Canada. This latter class mingle with those who are not Communists, preach their doctrine, and get in their work. Communists not only cause trouble in the ranks of labor, but in the ranks of society, and in the ranks of business. The situation as regards Soviet Russia propaganda is something akin to the German spy system before the great war. These spies mixed in England and other countries with the best, in fact they were educated and cultured men in many instances, but they had but one main idea, that was, "The Day" and the time, Germany would rule the world. Soviet Russia has a similar idea, with their Sovietism, and they have men working for them in all ranks. England had different outstanding men, who could see nothing wrong with Germany, but they woke up with a thud when the time to strike came. People in Canada today claim there is nothing wrong with Soviet Russia, and are pressing that Canada try the great untried experiment of Sovietism. Russia says that Communism is unworkable, but Russia aims at world domination.—Drumheller Review.

THE RIGHTS OF THE LOCAL PRINTER

Every merchant and business man uses printed matter, such as letters, envelopes or business forms. If you have a printer in your town just think of him, for in order to stay there he has to find the means whereby he can buy food and clothing. When some high-pressure salesman is tempting you to give him an order for his firm located many miles away,

think of your local man and give him your support. Remember, "he is like yourself; he can only continue if he receives the patronage of the community."

In some cases the local printer may be forced to charge you a little more, but for his restricted buying powers, but then you have had to do the same. So, too, may be inclined to send his cash away, but the chances are he will prefer to deal with the man who is trying his best to build up the welfare of the community. We cannot have a good business centre without some wide-awake merchants, but let us remember that a good printer gives the touch much to be desired in a progressive, go-ahead town. You will find him ready to show you his samples and stock of paper. He is personally at your command at all times; he makes the deal with you and delivers it to you in person. To you this is very much more satisfactory in the way of service and personal responsibility than dealing with an outside firm. Make your selection of stock and let your local printer do the rest. Reciprocity will be established and the community will be the better and richer.—Ex.

ARTIC VETERAN SEALER DEAD

New York, Aug. 21.—Captain William Bartlett, a king of the sealers and veteran seaman of nearly three score years in the Arctic, died today in bleak, wind-bitten Brigus, Newfoundland, at 84.

Word of the passing of Bartlett, one of the most colorful figures in that dangerous business of sealing, was received by George Palmer Putnam, publisher, from Bartlett's son, Captain Robert Bartlett, whose schooner Morrissey is in Franz Joseph Land.

Sea-faring men and sealers along the rock-ribbed coast of Newfoundland refer to Captain Bartlett, the elder, as the skipper who "never lost a man" in his 54 years of seal-hunting.

Annually, in small steamers, Captain Bartlett and 300 men would set out from Newfoundland ports to hunt seals in the treacherous Arctic for the fur and oil markets.

Deaths—from the hazards of ice, exhaustion and exposure—are frequent in these expeditions. Not only with Captain Bartlett's parties. The only man who ever died on one of his ships was a lumberman who was shipped before the voyage started.

Captain Bartlett could forecast the weather by the "smell of the wind," he read weather signs in drifting wisps of clouds. He knew infallibly when to recall his scattered crews.

Bartlett's men were sealers to the very marrow of their bones. Their catches always were the largest. Two years ago, just before the grizzled old captain retired, his men brought in 45,000 pelts, the largest haul in sealing history. His life-record of 500,000 pelts is looked upon with respect by those who are familiar with the hazards of the hunt.

Hardy sailormen from Devon and Dorset were Captain Bartlett's ancestors.

He was born and raised in Brigus, 40 miles from St. John's and 20 miles from Harbor Grace, which in later years Captain Bartlett saw grow into the jumping off place for trans-Atlantic flights.—Toronto Mail and Empire.

GOOD RULES FOR BAD TIMES

1. Begin the day with high expectations.
2. Work with a definite purpose.
3. Do everything promptly and thoroughly.
4. Avoid haste and waste.
5. Depend upon your own efforts.
6. Think only constructive thoughts.
7. Avoid false economy.
8. Shun pessimistic talk.
9. Be patient and persevering.
10. Dare to initiate big ideas.

To combat unfair truck competition, towns in Saskatchewan are demanding a license of \$75 from outside trucks doing business in the towns.

BLAIRMORE UNITED CHURCH
Rev. J. W. Smith, R.D., Pastor

Serve the church that the church may serve you.

Services, Sunday, September 6th.
10 a.m.—JUNIOR SCHOOL.
11 a.m.—SENIOR SCHOOL.
7:30 p.m.—PUBLIC WORSHIP.
Rev. Albert E. Lurke, of Coleman, will deliver a special Labor Day message, "The New Social Order, What is it to be?"

NOTE—The Junior school will continue to meet at 10 a.m. for a few Sundays. Evening worship is recommended.

Harvest festival services will be held on Sunday, September 13th, at a Tuesday night, a concert and sale of vegetables, fruits, etc., will be held. Further announcements will be made next week.

ST. LUKE'S, BLAIRMORE A. S. Partington, Vicar

Services Sunday, September 6th—Morning service at 11 o'clock.

LEADING CANADIANS TO VISIT CHURCHILL

Leading figures in Canadian industrial and business life are, this week, inspecting the modern seaport at Churchill.

Approximately 300 delegates under the auspices of the Canadian Chamber of Commerce, are "at home" in special Canadian National trains which were chartered to take the party north, prior to the convention to be held at Regina this weekend.

In addition to a brief stay at Churchill, mining, lumbering and agricultural districts along the railway to Hudson's Bay are being visited. Flin Flin and Sheridan are also features of the journey.

Initial shipments of grain from western Canada to Europe, via Churchill, commenced last week when 12 cars of No. 1 northern wheat were shipped from Saskatoon. This shipment was used for testing the grain handling facilities of the new 2,000,000-bushel elevator, and further shipments will go north regularly for the loading of the first ship between September 15 and 20, and of the second ship between September 20 and 25.

POLICE STOP COMMUNIST PARADE AT DRUMHELLER

The parades were met by Chief Duncan and his men, Sergeant Skelton of the Alberta Provincial Police, Sergeant Clarke, of the Royal Canadian Mounted Police, and Constable Peden, of the Canadian National Police. Chief Duncan, representing the city, ordered parade to stop. It stopped, and "General" McDonald, and other ring leaders saw that police meant business, and they advised their men to go back to the hill. A large delegation of the Drumheller Command of the Canadian Legion were present, as well as many citizens, determined to see that the city bylaw and the Union Jack were both respected. However, police handled the situation very well, the only arrested man at that time being Ledanyi, who was found with a lot of rocks in his pocket. Rocks, all along the route of march, which were dropped by the Reds, were subsequently found.—Drumheller Review.

Railroad companies built their own tracks. They laid their rails through virgin country, which they helped very largely in developing. The Canadian Pacific fifty years ago took hold, step, and has done more for Canadian development and binding the provinces together than any other agency.—Coleman Journal.

BELLEVUE FLOWER SHOW AND SPORTS

All are anxiously looking forward to the annual flower show and sports, which will be held at Bellevue on Monday next.

The spacious arena will house the horticultural, domestic science, poultry and school exhibits, which this year promises to surpass in number of entries and the quality of exhibits any previous event.

This will be the fourteenth exhibition of the Bellevue and District Horticultural, Industrial and Poultry Society.

In connection with the exhibition, the customary programme of field sports will be carried out, the main features being the sixth annual five-mile road race, for which there are quite a number of entries.

The sports programme is as follows:

Children's Parade from the School House to Sports Field at 10:30 a.m. for Children's Races

6th Annual 5-Mile Road Race, at 12:30

Under Amateur Rules
Prize Value:—1st, \$16.00; 2nd, \$10.00; 3rd, \$4.00
Start and Finish at Cole's Theatre

Field Events, 2:30 p.m.

	1st	2nd	3rd
2:30-1. Boys' one-mile Bicycle Race (under 18 years)	\$5.00	\$3.00	\$2.00
2. Old Men's Race (over 40 years) handicapped	5.00	3.00	2.00
3. Girls' 75 yard sprint, under 14 years	3.00	2.00	1.00
4. Boys' 75 yard sprint, under 14 years	3.00	2.00	1.00
5. Men's High Jump	5.00	2.50	1.00
6. Boys' High Jump, under 16 years	3.00	2.00	1.00
7. Girls' High Jump, under 16 years	3.00	2.00	1.00
8. Men's 100-yard sprint, under 16 years	5.00	3.00	1.00
9. Boys' 100-yard sprint, under 16 years	3.00	2.00	1.00
10. Men's Hop, Step and Jump	5.00	2.50	1.00
11. Girls' 100-yard sprint, under 16 years	3.00	2.00	1.00
12. Men's 1/2-mile Race	5.00	3.00	1.00

14. Boys' 100-yard sprint, under 19 years	3.00	2.00	1.00
15. Men's 1/4 mile Race	5.00	3.00	1.00
16. Girls' High Jump, under 19 years	3.00	2.00	1.00
17. Boys' High Jump, under 19 years	3.00	2.00	1.00

3rd Annual 2 1/2 Mile Junior Race, 5:30

Under 19 years — Three Value Prizes

THE GREAT LAKES

It is not on land alone that Canada's beauties are to be found, for the Great Lakes Steamship Service between Port William and Port McNicoll is but another of the Canadian Pacific's many highways to and through them.

Three splendidly appointed vessels, the "Assiniboia," "Kewatin" and "Manitoba" maintain a regular schedule throughout the summer season. Between the two ports above mentioned, Wednesdays and Saturdays are sailing days in either direction, while the service from Owen Sound to Port William is on Monday, returning on Thursdays.

The route of the vessels, which offer a splendid rest from the sweltering days and nights ashore, is through Georgian Bay, Lake Huron and the Sault Ste. Marie locks, where there is a rise of some 75 feet to Lake Superior across which the courses lies to Port William, Canada's greatest granary. The size of these huge inland seas is not realized by those who have not travelled on them. Many a good blue-water sailor has learned things from the Great Lakes, which have bred up a race of navigators unrivaled anywhere in the world.

Transcontinental travellers find excellent rail connections by Canadian Pacific lines at both ends of his delightful 600 mile water journey, which occupies some 39 hours. The ships are the last word in comfort, with cozy cabins plenty of deck space for promenading and sports, excellent dining rooms and dancing to a smart orchestra every evening.

All in all, with mountain plain and water, the C.W.N.A.'s annual pilgrimage through Canada offered as generous a lesson in the Dominion's possibilities as can readily be imagined.—Ex.

BIGGEST SPORTS EVENT STAGED IN THE NORTH

More than 2,500 residents of Manitoba's north country gathered in the Canadian National Railways station on the shore of Lake Athabasca, at Cranberry Portage, Man., to celebrate the first Erie's Flag Day north of 54 in the province.

Bearded trappers from the lonely

STRANGE CARGO ARRIVES IN CANADA

What looked more like the arrival of an up to date Noah's Ark, was the landing in Canada last week of the cargo from the Scottish liner, "Athens," from Glasgow. The shipment was made up of kangaroos, leopards, flamingoes, cubs, snakes, some odd specimens of parakeet and many types of zebras.

The shipment, in charge of the Canadian National Express Company, was destined for Toronto, where it is now shown as part of the Canadian National Exhibition.

William Hawke, an employee of the Consolidated Co. at Kimberley, was killed by a fall of rock on Thursday last. Hawke was 46 years of age, and had been in the employ of Consolidated since 1924.

BUSINESS IS BUSINESS

The manager of an automotive zone office in Montreal is telling a funny one. One of the dealers in the metropolis was selling a car to a young man who was about to be married. Just a week before the day set for the ceremony a difference of opinion between the young couple developed and the wedding was called off indefinitely. The disappointed bridegroom felt that under the circumstances he had no immediate use for an automobile, and at the same time he felt very badly about having invested money in a new blue suit, a wing collar and a white necktie. Originally the automobile dealer had no interest in the bridegroom's sartorial investment, but he did want to sell the car, and in order finally to clinch the deal he took in trade the blue suit, wing collar and white necktie at a respectable valuation.

Workers on the trans-Canada highway through northern Ontario will be paid at the rate of thirty cents an hour for an eight-hour day. They will be assessed 75 cents to \$1.00 for ratons.

Father: "Bankruptcy, my son, is when you put your money in your hip pocket and let your creditors take your coat."

Sketches**
By Cy

Pro Bono Publico

"Good mornin', Missus Smith."
"Good mornin', Missus Jones."
"What's th' matter w' yer arm?"
"Oh, Missus Smith, I tripped on th' step o' th' Green Man yesterday evenin' an' broke it. They've no right t' let 'em 'ave steps as isn't even w' th' sidewalk, Missus Smith. Anyway, me family doctor at th' Dispensary fixed it up and it's feelin' better now—well, 'e ain't exactly a doctor, 'e's a bone-setter. At they say, 'Pro bono publico,' 'e's for th' bones o' th' people!"

If there were more of such this "family doctor" in this good old world today than there is, it would be a better old world than it is—men and women who are "for th' bones o' th' people," or for the homes of the people or for the good of the people generally.

After all, the real—not the superficial or temporary—interest of the individual and that of society should not conflict. The individualistic and the socialistic concept are but "two aspects of one great unitary fact." This fact is life—not a thing but a process. "Life" says one, "individuals did not constitute an organized society; if each person lived in an impenetrable shell of self-sufficiency; if there were no bond uniting all together in one common set of activities and one common destiny; if there were no common ideal towards which all are striving—then there would be no need for education."

Not only, therefore, does the need for education thus arise, but because life touches life in social activity, the possibility for an education is obvious.

The great problem of the world today—always has been and always will be—is to bring into equitable and just relationship these two concepts, the individualistic and the socialistic.

What may be said of the individual man or woman may be said also of communities, nations as well as others. Herein may be found the very best of reasons why the World's Grain Exhibition and Conference to be held at Regina in 1932 will take its place among many other great movements, (though it may not be designed specifically for the purpose), which have and will wield an enormous educational influence in forwarding a solution of the problem suggested. It therefore deserves the support of every citizen.

SALES AGENCY IS CREATED BY ALBERTA POOL

Calgary, Alberta.—The establishment of a provincial selling agency, which would operate a seat on the Winnipeg Grain Exchange for selling and hedging purposes, was announced officially by the Alberta Wheat Pool Thursday, August 27. The agency will handle sales of the 1931 Alberta crop and is now in operation.

R. D. Purdy, general manager of the Alberta Wheat Pool, will head the selling department which will operate independently of the Central agency which in the past has had charge of disposition of all prairie grain. The Central selling agency will continue to operate under John I. McFarland until the 1930 crop is sold entirely.

The alteration of the Alberta system, said Mr. Purdy, will not affect any arrangements announced by provincial and Federal Governments, and the selling agency will be a department of the Alberta Wheat Pool. Farmers could still sell their wheat at the pool elevators and receive the open market price or they could accept the initial pool payment of 30 cents a bushel and receive additional payments later. The five-cent per bushel bonus allowed by the Federal Government as a relief measure for farmers would be payable on delivery, whether the farmer sold on pool basis or took the open market price.

All grain received by the Alberta selling department would be disposed of through regular market channels, he said.

Junkers Freight Plane

Big Plane Will Be Used For Freight Cargoes In West

Montreal, Que.—Destined to carry freight cargoes in northwestern Canada, a huge all-metal junkers freight plane has been purchased by Canadian Airways and will be shipped to the northwest within a few months, it was announced here.

The new Junkers JU-52, a development of the trans-Atlantic plane "Bremer," will be the largest freight plane in Canada. Fully loaded, it weighs four tons, and the single B.M.W. 655 horsepower engine allows a cruising speed of 99 miles an hour, and a range of nearly 1,000 miles, which, by special tank can be increased to 1,863 miles. The big plane can be landed at about 47 miles an hour.

Bas Use Of Benzol

Toronto, Ont.—Use of benzol in Ontario factories has been prohibited in an order issued by Hon. Dr. J. D. Monteith, Provincial Minister of Public Works and Labour. This use of benzol has been proven to the department to be injurious to the health of individuals. That fact has been demonstrated on the evidence of chemists who have investigated, and the labour department has prohibited the use of benzol," said Dr. Monteith.

May Withdraw Grants

Toronto, Ont.—Fall Fair Associations in Ontario may have to disperse with the usual government grants in 1932, according to a warning issued by Hon. T. L. Kennedy, Provincial Minister of Agriculture. The associations were warned that they must discontinue the practice of looking to the Provincial Government for financial assistance. This year the usual grants, estimated between \$80,000 and \$100,000, will be maintained.

Cattle Prices May Be Lower

Ottawa, Ont.—Reporting on conditions now prevailing in cattle markets in the Old Country, the Canadian agricultural products representatives in Great Britain in a cable to the livestock commissioner here says: "Cattle markets weaker. Our best hope is strict selection for type and quality of all weights. Lower prices likely."

May Open Canadian Branches

Montreal, Que.—Six large industrial firms of the British Isles are seriously considering the establishment of branch factories in the Dominion during the coming year, F. W. Field, His Majesty's Trade Commissioner, told members of a service club, during an address on the industrial situation in Great Britain.

Celebrates Birthday

Ottawa, Ont.—Hon. G. D. Robertson, Minister of Labour, was 57 years old August 26. From the staff of the department Senator Robertson received a magnificent bouquet of roses, while numerous messages of congratulation came from friends and colleagues. The minister was born in Welland, Ont., on August 28, 1874.

W. N. U. 1905

Will Attend Conference

Mahatma Gandhi Leaves For London Parley

Simla, India.—After months of intense and "heart-searching," Mahatma Gandhi has announced his "inner voice" has told him it would be to India's interest for him to go to London to attend the second round table conference.

At the end of almost three hours' conversation with Viceroy Earl Willingdon, who left a sick bed to see him, the Mahatma agreed to co-operate with the round table conference.

His decision was based on an attitude of "mutual accommodation and compromise." The Nationalist leader agreed to drop his demand for the appointment of an arbitration board to determine whether there have been breaches of the Delhi armistice and the viceroy consented to institute an inquiry into the alleged excesses of tax collectors in the Bardoli district.

Thus, after nearly 20 years' absence from England, Gandhi will set sail for London with Mahatma Mohan Malaviya and Mme. Sarojini, and delegates, and will reach his destination September 9. He will take aboard his goats to provide him with milk.

Defends Position

Hon. J. H. Thomas Says Nation's Interest Is Above Party

London, England.—In a letter to the executive committee of the Labor Party of Derby, the borough which he represents in parliament, Dr. Hon. J. H. Thomas defended himself for following Prime Minister MacDonald and joining the national government.

"I know my action will be understood by many," he said in the letter. "I knew full well I should be subjected to criticism and abuse, but I also knew the nation's interest, which is greater than that of any individual or party, was at stake."

Mr. Thomas explained he had abandoned no policy and sacrificed none of his principles. "My only policy," he said, "has been to face boldly the grave emergency in the nation's affairs, and I have decided to remain in the new government only as long as the crisis lasts, and until stability is assured."

He added that in the elections which were inevitable, he would "accept of verdict, as a consequence of my own action."

Good Crops At The Pas

Acres In Limited But Yield Reported Remarkably High

The Pas, Man.—Fully two weeks behind some sections of the southern part of the west, cutting operations started last week on wheat and oat fields here. While there is only a limited acreage in this part of the country the yield has been remarkably high according to farmers in this district.

Oats have run as high as 50 bushels, while wheat has averaged 30 and 35 bushels. This is the first consecutive year that grain yields have been good in this area, and considerable interest is being taken in the possibility of throwing open the Carrot River Valley to settlers. This triangle of rich river-silt has produced sensational yields for years, but as yet, only squatters are working the land, as it is not open to homesteaders. The local Board of Trade has received enquiries from farmers in the southern part of Saskatchewan regarding the possibility of establishing mixed farming in that area.

Wheat Bonus

Winnipeg, Man.—Farmers are assured of the five-cent bonus on wheat pending arrangements now being made by the Board of Grain Commissioners. E. H. Ramsay, chairman of the board, stated here recently, Mr. Ramsay's attention had been drawn to a suggestion that farmers who have threshed wheat are withholding it from the market because the machinery for the distribution of the bonus had not yet been perfected.

Printing Plants Wrecked

Montreal, Que.—Hopelessly ruined by sabotage of the printing presses and the firing of the plant, the weekly newspapers Le Morin, Le Chateau and Le Goglu will disappear from Montreal journalism, Joseph Menard, joint owner with Adrien Arcand, told the fire commissioner's court here at a hearing to probe circumstances surrounding the wrecking of the printing plant.

Had Stormy Trip

Southampton, England.—Owing to a violent storm in the English Channel, the Canadian Pacific liner "Empress of Britain" was unable to call at Cherbourg. When the liner docked at Southampton, Captain Latta said he had fought bad weather all the way across the Atlantic.

Historic Sites

Cairn Erected To Mark Landing Of General Wolfe

Sydney, N.S.—"To the honored dead of two nations."

This brief tribute, dropped by a squadron of Royal Canadian Air Force "Planes, soaring high overhead, epitomized the spirit and thoughts of over 1,200 people gathered on the rocky bluff overlooking Kennington Cove to witness the unveiling by Hon. Frank Stanfield, Lieutenant-Governor of Nova Scotia, of the beautiful memorial cairn erected by the Historic Sites and Monuments Board of Canada, to mark permanently the site of Wolfe's landing on June 8, 1758, six weeks prior to the fall of Louisbourg. Lieutenant-Governor Stanfield pulled the cord unveiling the cairn which now permanently marks the site of Wolfe's hazardous undertaking.

Raise In Gasoline Prices

United Protest From Western Provinces Is Urged

Calgary, Alberta.—Efforts to bring a united protest from all western provinces against increase in gasoline prices were instituted here by directors of the Alberta Motor Association.

The recent advance of one and one-half cents a gallon in the gasoline price was scored by the Alberta directors as unwarranted. Copies of the resolution embodying the criticism are being sent to all motor associations in Manitoba, Saskatchewan and British Columbia, urging similar action to be taken.

RELIEF PLANS WILL EMBRACE PUBLIC WORKS

Ottawa, Ont.—Canada's Government is carefully considering a scheme to bring water from the Saskatchewan River to Moose Jaw and Regina, in southern Saskatchewan, according to a statement by Hon. G. D. Robertson, Minister of Labour.

Acting on a message from Hon. Robert Weir, Minister of Agriculture, now in the west, Senator Robertson has recommended to the Department of Public Works that a government engineer be sent to Saskatchewan to examine the possibilities of the proposal. Such a project, the Minister of Labour said, would no doubt operate to create wide employment facilities in that area.

A tentative agreement has been reached with the province of New Brunswick in the matter of employment relief, Senator Robertson said.

Details of the arrangement would, however, not be made public until Premier R. B. Bennett returns from western Canada and the recommendations are approved by the government-council.

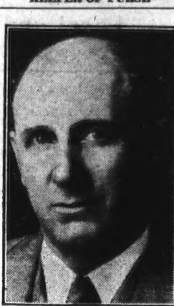

Conferences were proceeding between the minister and representatives of Manitoba. It is expected that after discussing individual requests of the provinces the entire programme will be submitted to the governor-in-council within a few days.

CLUE TO NUNGESSOR'S FATE

John Gaucher (left) and L. V. Allers are shown reading the note they found in a cognac bottle off Five Islands. The note, reproduced below, is believed to be from C. M. Nungesser and Major Francis Coll, the interlopers French fliers, who took off from Paris on May 8, 1927, on a non-stop flight to New York. They were never heard of again. Translated from the French the note reads: "Sinking at this moment in Labrador." It bears a signature believed to be that of Coll.

KEEPER OF FURSE

J. A. McIsaac, Dominion Honorary Treasurer of the Canadian Legion of the British Empire Service League, who is busy preparing for the gigantic conference to be held in Toronto this week.

Trans-Canada Highway

Locations Of Final Sections Of Road In Ontario Announced

Toronto, Ont.—Designation of first sections of the trans-Canada Highway in Ontario was announced by Premier Geo. S. Henry following approval by the cabinet. This is the first step in commencing work for unemployed by the government at work camps in the north in conjunction with Federal Government grants.

Two sections are designated in the plan. The first section extends from Pembroke on the east, to Mattawa and hence westerly to North Bay. The second section commences at the town of Schreiber, Thunder Bay district, and goes west to the Manitoba border, following the north shore of Lake Superior to the village of Nipigon, thence to Port Arthur and Fort William, proceeding through Upsala, Dryden and Kenora.

Preparing To Send Goods To Australia

Good-Will Ship To Leave Montreal Late In October

Toronto, Ont.—Preparations for the despatch to Australia of a good-will ship, laden with Canadian goods for export to the Commonwealth are under way, according to a statement issued by J. E. Walsh, general manager of the Canadian Manufacturers' Association.

The vessel, "The Canadian Constructor," of the Canadian National Steamship Lines, will leave Montreal October 25, bound for Australian ports. A similar trip by the same ship from Australia to Canada will precede the trip for which arrangements are now under way.

Joins Up With Gandhi

Ahmadabad, India.—Forewearing the pleasure of the world, Miss Nilla Cram Cook, 21-year-old daughter of the late George Cram Cook, United States poet and playwright, has joined Mahatma's Gandhi's movement for the liberation of India. She is the first United States National to be admitted to his model colony, conducted on the banks of the Sacred Sharmati River.

Destructive Wind Storm

Man Killed and Others Injured When Tornado Strikes Southern Saskatchewan

Estevan, Sask.—One man was killed, two others injured and heavy damage done when a tornado swept through Estevan and surrounding districts. While assisting workmen to pin down a tent during the height of the storm at a construction camp about two miles west of here, Robert Mitchell Henderson, 50, Calgary, partner in the bridge contracting firm of Manns and Henderson, was killed instantly when struck by a flying timber. The missile hit him in the head, fracturing his skull. It has been decided that an inquest is unnecessary.

Louis Gosselin, of Estevan and Dalton McKay, of Saskatoon, laborers with the construction gang, suffered bruises and shock when struck by flying timbers and were brought to Estevan hospital for treatment.

The terrific gale sent box cars crashing into the round house at the Traux-Traxer Coal Company Plant, while the roof of the grandstand at the exhibition grounds was ripped entirely off and several barns were blown down. The trestle bridge on the Neptune branch of the C.P.R., five miles from town, was splintered by the wind. A garage was blown down in Estevan, and the roof of the D. L. Irvine residence was torn off.

Market For Butter

Canadian Dairy Produce Is In Demand In Great Britain

Montreal, Que.—Dairy produce from Canada is very much in demand among British buyers and consumers, and the British market can absorb all Canadian dairy farmers can send, Dr. J. A. Ruddick, Canada's veteran dairy commissioner, stated here on his arrival from England.

"The prospects for butter especially are very good," said Dr. Ruddick. "Canadian cheese is also very popular and tops the market in its class."

SINGLE PURPOSE IS TO RESTORE BRITISH CREDIT

London, England.—The new national government has already got down to its job of laying a firm foundation for British credit. Its opening meeting revealed complete unanimity in its task. It appointed the necessary committees and proposes to go ahead as speedily as possible with the preparation necessary for new legislation.

The method of legislation, it is authoritatively intimated, will be such as to make it effective for immediate operation. It is stated, although not officially confirmed, that in effecting economies, the national government will seek parliamentary authority to proceed by order-in-council.

The government's scheme for balancing the budget and the restoration of British credit will have the double feature of reductions in expenditure and increases in taxation. The plan is to make the entire scheme a complete unity, and a characteristic of that unity is that it is based on equal sacrifice according to position of various classes of taxpayers. In government circles statements that the burden of the new scheme will fall chiefly on those least able to bear it are described as absolutely untrue.

All controversial legislation now before parliament will be suspended. The new government proposes to concentrate on the supreme task of restoring credit, and in that task, it is stated in government circles, there can be no faltering.

Both Conservative and Liberal members of the new administration believe they will have behind them the virtually unanimous support of their parties. Rt. Hon. David Lloyd George and Lord Grey alike, it is understood, have signified their entire agreement with the Liberals in their acceptance of office.

Yet while an overwhelming majority of Conservatives and Liberals are backing the new government, Laborites are forming up behind the new administration. After several hours' deliberation the general council of the Trades Union Congress, the national executive of the Labor Party and the consulting committee of the Parliamentary Labor Party unanimously decided that the new government should be vigorously opposed in parliament and by the Labor movement throughout the country. They expressed their approval of the action taken by certain ministers of the late government in declining to support their support to the new administration, and recommended that the Parliamentary Labor Party constitute itself the official parliamentary opposition.

ARRANGE LOAN TO STABILIZE POUND STERLING

New York.—A private banking credit, believed to be the largest in financial history, is being marshalled in New York and Paris, Wall Street learned, as an invisible bulwark for the British pound sterling.

Both New York and Paris bankers, it was said in highest Wall Street banking circles, propose to make the credit so large that there can be no further question as to the stability of the pound, which is so widely used as the common medium of international exchange.

While bankers were not prepared as yet to reveal the exact size of the loan it is believed that it will be between \$300,000,000 and \$500,000,000, provided in equal portions by New York and Paris bankers. It is known that each portion is expected to be larger than the \$100,000,000 credit granted to the British Government in 1925 by a syndicate headed by J. P. Morgan & Co.

It was formally stated at the Morgan offices that discussions are under way, both here and in Paris, with reference to the credit, and decided progress has been made.

It was acknowledged in well informed quarters that the readiness of the United States and French bankers to extend the credit in large measure depended upon assurances from the British Government that the program of governmental economies to which the new cabinet is committed, be adopted.

It was explained, however, that the bankers were concerned merely with financial principles of sound finance, and were not concerned with specific measures of economy which the British cabinet may see fit to adopt. Recent charges in British Labor circles that United States bankers have broadened their backs for a reduction of the debt have been emphatically denied.

In some of Wall Street's highest banking circles, the return of stability to British finances is regarded as vital to world economic recovery and the economy programme of the new coalition government, together with the bolstering of it by a large international loan, are regarded as major steps toward lifting the world from the mire of depression.

'Plane Plunges Into Sea

Twelve Persons Rescued By Timely Arrival Of Fishing Craft

Gloucester, Mass.—Twelve persons were rescued from the fog-enshrouded waters off Gloucester after a Pan-American Airways amphibian plane, bound from Halifax to Boston, plunged into the sea and sank before their eyes. One passenger, Edward Banwell, 70, of Halifax, was missing. The fishing schooner, "Nova Julia," feeling its way into this port, came upon the nine passengers and three members of the crew as they clung desperately to a storm-torn rubber boat, the only part of the huge ship to stay afloat.

W. L. Elmore, of Boston, the pilot risked his own life in several dives before the survivors were able to release the rubber boat, while the eleven others, including three women, managed to keep from sinking.

Members of the rescued party said the plane dove suddenly after the pilot attempted to drop below a fog bank. All but one of the 13 occupants escaped from the cabin. The only one not able to get out was an old man, who, they believe, went down with the ship.

Hampered by clothing and with darkness gradually approaching, the survivors were about to give up hope when the "Nova Julia" went alongside and pulled them to safety.

Canadians In Civil Service

Ottawa.—Approximately 85 per cent. of civil servants are of Canadian birth, H. H. Rowatt, Deputy Minister of Interior has stated, and accordingly in the reduction of staff in that department a greater proportion of those dismissed were Canadians. A complaint was voiced at the convention of the Native Sons of Canada that twice as many Canadians had been dismissed as those born in other countries, due to transference of natural resources to the western provinces.

Will Deport Canadians

Windsor, Ont.—A number of Canadian citizens from widely separated parts of the Dominion have run afoul of the immigration authorities at Detroit and are held in Wayne County Jail awaiting deportation. Among the group are Henry S. Mabey, of Calgary, Alberta, and Gustave A. Auburn, Saskatoon, Saskatchewan.

Local and General Items

Schools reopened here on Tuesday.

Fire on Tuesday destroyed the Salmon hotel at Nelson.

A. J. Kelly and family have moved to the Olivier residence here.

FOR STOMACH, Liver or Bow trouble, see your local chiropractor.

Health Inspector J. Williams and hotels Inspector Follen were visitors to this district last week.

Nineteen Canadian women were dismissed from municipal hospital staffs in Boston in two days last week.

Calgary will likely follow the step taken by the Lethbridge school board to levy tuition fees for repeaters.

WANTED — First-class drummer for dance orchestra. Write "O. K.", care Enterprise office.

A survey was made the latter part of the week for the straightening of the road leading from west to Police Flats.

Miss Evelyn Bennett returned to Calgary last Thursday, where she will enter The Holy Cross hospital as nurse in training.

Mrs. Bond returned during the week from a holiday spent at Banff, Calgary and Macleod, and has already resumed her piano classes.

EYES EXAMINED—at the Blairmore Pharmacy on Saturday, September the 12th, E. J. ANDERSON, B.Sc., of Calgary, in attendance.

Mr. W. M. Bush today expects a visit from three of his sons, Wilbert, of Walkerton, Ontario; Howard, of Chicago, and Frank and wife, of Seattle.

WANTED — Local salesman or saleslady to take orders, sell established line of Ladies' Dresses. Leads given, conveyance, good proposition. See G. Kafoury immediately.

Henry Zak and family have returned from a pleasant holiday trip by motor to Pacific coast points. At Vancouver, Henry had the pleasure of meeting Alex. Nemrava, Joe Kidd, Mike Russe and other young gaffers, formerly of this district.

The provincial department of public works has received quite a number of very urgent requests from this district that as a relief measure the government undertake the building of a new road over the Frank slide, north of the track, rather than later on be obliged to hand out direct relief to people in this district, which prospect is practically inevitable.

Rev. and Mrs. G. Harrison Villott, formerly of Pincher Creek, have as their guests at McDougall manse at Edmonton over the week end, Rev. J. W. Smith, B.D., of Blairmore, and Rev. C. W. Krug, B.A., assistant minister of Bloor Street United church, Toronto, who is returning to his work in the east after serving during the summer in the Peace River country.—Ex.

The up-to-date way in which to enter a newspaper office is this: Advance to the inner door and give three raps. The angel will attend to the alarm. You will then tell your name, postoffice address and the number of years you owe for the paper. You will then be admitted into the sanctum and will advance to the centre of the room and address the editor with the following countersign: Hold the right hand about two feet from the body with the thumb and forefinger clasping currency or a cheque, which you will drop into the editor's hand, saying "Were you looking for me?" The editor will clasp your hand, pressing the bill, and will say, "You bet!"

Pincher Creek schools reopened on Monday, August the 31st.

Efforts are being made to keep Communists in cool places.

CHIROPRACTIC for Lumbago, Sciatica, Neuritis, Rheumatism.

Mr. and Mrs. Sidney White have taken up residence in the Dunkley house.

The Hillcrest All-Stars and the Pick-of-the-Pass ball teams played to a draw here on Friday night.

SHACKS, one and two-room; also garage, for rent. Apply to The Enterprise.

Mrs. Ludwig Haug, mother of Ernest Haug, of Waterton Lakes, died at Revelstoke last week, aged seventy-four.

Constable and Mrs. Hammond, A. P.P. of Trochu, passed through Blairmore the early part of the week on a brief vacation trip west.

ALTERNATE MUSIC STUDIO—Piano, Band and Orchestra Instruments. \$5.00 in advance for five lessons, or by lesson \$1.50.

Miss Norma Joyce, teacher of Cyr school, formerly of Blairmore, will have charge of the Robert Kerr school, south of Pincher Creek, this term.

Forest fires are still raging in this district, the most dangerous as we go to press being west of Coleman, where a new outbreak occurred this morning.

Miss Louise and Lillian Knapman leave by tonight's trains for Bellingham, Washington, where they will visit their parents and possibly reside in future.

FOR SALE — Four-room House, with bathroom; water free; piped in from spring. Also two lots, with two-room shack, woodshed, stable, chicken house. Price \$400. Apply to P. O. Box 45 or The Enterprise.

F. Keer was up from Macleod Saturday and Sunday. Mrs. Keer and children have been visiting her parents, Mr. and Mrs. C. J. Steen, for several weeks, while Mr. Keer was operating a tractor on road work; but he is to take charge of the shop of the provincial department of public works in Macleod in September. —Nanton News.

Mrs. Gwilym Evans, accompanied by her father and two sisters, returned home, after an extended holiday at her father's residence at Blairmore. Mr. McVey is 58 years old, but so jubilant when the smell of the jackpines got into his olfactory nerves, he did the kick and knocked the shingles off the roof. —Saunders item in Red Deer Advocate.

Famous racehorses, blue grass racing farms in Kentucky, the Lexington racetrack and other vivid and authentic detail is seen in "Sporting Blood," which comes to Cole's theatre, Bellevue, on Monday, Tuesday and Wednesday. Clark Gable, Ernest Torrence, Madge Evans and Lew Cody are in the leading roles. The picture, based on the romance, "Horseflesh," by Frederick H. Brennan, is a story of turf enthusiasts with the panorama of the racing game as a huge animated background. Primarily, however, it is a love story. The human characters who affect the life of a racehorse are the prime factors, and the love drama of a gambler's sweetheart and a dealer in a gambling hall who find regeneration in trying to bring back an abused racehorse, is the central theme. Tricks of crooked gambling and crooked racing are exposed.

NO FUNDS

HAVE you ever had a check returned to you so marked? What a sharp financial lesson! Every time you suffer indigestion from unwise eating, your body is giving the same kind of warning.

To enjoy the blessings of health, stick to the simple, wholesome foods.

MOTHER'S BREAD
Lays up a reserve of strength and energy. Eat it regularly at every meal and note your increasing health and joy in living.
